and important molecule in metabolism, used in many biochemical reactions. Main use is to convey the carbon atoms within the acetyl group to the citric acid cycle to be oxidized for energy production. this compound forms the common entry point into the Krebs's cycle for the oxidation of carbohydrate and fat.

**ACE Essentials of Exercise Science key words Flashcards**  
In science, a hypothesis proposes a relationship between factors called variables. A good hypothesis relates an independent variable and a dependent variable. The effect on the dependent variable depends on or is determined by what happens when you change the independent variable .

**What Are the Elements of a Good Hypothesis?**  
As key decisions are often made by only reading the executive summary it is imperative that all relevant information is presented. Ensure that any generalisations do not mask important points. In the process of summarising the key findings, it is essential that crucial caveats, stipulations, qualifications or limitations are not omitted.

The science fiction genre, along with fantasy, can easily be considered to be more demanding, in terms of world building, than other genres. Science fiction demands that everything in your story is scientifically based, if not confirmed, especially if you're writing a story about teleportation, or space travel.
