Because this site is dedicated to free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars).

That C305 connector is recessed so that the connector could be near your feet, but not be raised up. So it is a low-point in the floor that water would collect in. Then the harness would corrode from the moisture. So, you're looking for corrosion on the inside and outside parts of that connector and the wires leading up to them. Thanks Doug!

The c305 connector carries the wiring for three major subsystems in your Rendezvous' overall electrical system, the fuel pump, evaporation system and all-wheel-drive. Though this part has been subject to water leakage due to the design of the vehicle, I believe it would be a much better idea to replace the terminals within the connector rather than replacing the entire device and hard-wiring the systems.

I crawled under the van tonight after I got home from work. I unplugged the tank harness from C305 to verify I didn't break a stab off or something, or only partially reconnect the plug. Everything looked good. However, the gas tank harness plug (female part) appeared to have some connectors that may have been spread a bit too much.
