All I know is, on the Ford VSG411 and LRG423, when you hit the E stop, it takes power away from the anti diesel solenoid on the carb. The engine will run for a short moment, then die because the fuel flow through the main jet of carb is cut off. If that solenoid isn't working properly, the engine will continue to run, or, "diesel".

JLG replaces the discontinued line of Ford gas-powered engines with the GM Vortec 3000. November 3, 2005 ♠ Despite record revenue reports from aerial lift manufacturers and the entire world clamoring for new equipment, the short supply of components, specifically gas engines, is one trend hindering production of new boom and scissor lifts.
