FileBRIDGE Records User Guide
A series of Unicode-compliant (UTF-8) file types was added for Origin 2018. Upgrade users may recognize that some of the old familiar file types now have a Unicode counterpart, denoted by an appended 'u' (e.g. *.opj => *.opju). Origin versions 2018 and later will read and write the older, non-Unicode file types.

Helix supports a set of file types that enable it to determine how files are stored by the Helix server and whether the file can be diffed. When you add a file, Helix attempts to determine the type of the file automatically: Helix first determines whether the file is a regular file or a symbolic link, and then examines the first part of the file to determine whether it's text or binary.
